

Intermountain Health partners with a company called Certiphi to complete pre-screening drug test, criminal background checks, employment verification, education verification, license and certification verification, and motor vehicle reports (MVR). Intermountain Healthcare will complete one or more of these checks based on the requirements of your new position.

Shortly after submitting this task, you will receive an e-mail from Certiphi. Please complete as soon as possible.

You may be asked to provide dates of past employment. If you have paystubs or W-2's this will help complete this portion of the request.

As required for your position, you may need to provide any licensing or certifications required for the job. Many positions require current valid Basic Life Support (BLS) certification. If your position requires BLS, please review the list of qualifying certifications found under Job Requirements on our Careers page or by clicking [here](#).

If you do not receive the email from Certiphi in the next few days, be sure to check your SPAM and JUNK folders, just in case the email went there unintentionally.

If you still cannot find the email, please call Vonda Arias at +1 801-442-2247.
